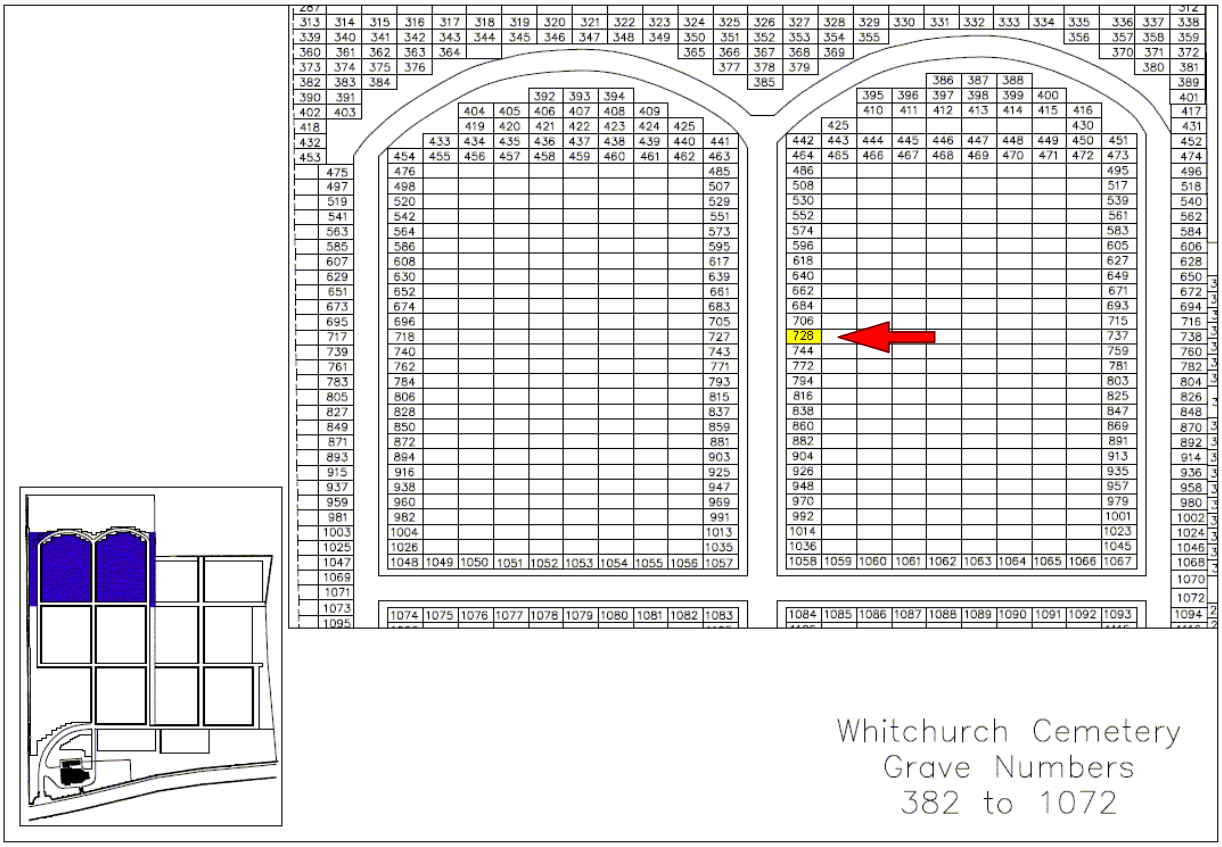
Locating a grave at Whitchurch Cemetery can be done from this web site by following these simple steps.

First we need to find out the grave space number from the grave index.

1. Select the 'Grave Index' tab at the top of the window.
2. Select the surname's first letter from the alphabet below tabs.
   Example: for Sir Edward German select G.
3. Select the date of burial.
   Example: Sir Edward German who died in 1936. This gives us two date ranges that include 1936. Selecting the first range '1931 – 1936' gives four entries for 1936 but no Sir Edward German. At the bottom of the screen there are buttons that go to the previous page, back to the index and next page. By selecting the next page it takes us to the page covering '1936 – 1941'. The first entry is Sir Edward German detailing his age, place of death, date of burial and Grave space number '728'.

Locating a grave from the grave number.


1. Select the 'Grave Location' tab at the top of the window.
2. There are two different areas depending upon the type of burial. There are the burial plots that have standard grave number and the garden of remembrance (also known as the Rose Garden) that starts the number with GR. Select the appropriate grave number range or Rose garden number range on the right side of the window.
   Example: Sir Edward Germans grave number is '728'. The number is not started with GR therefore the plot is a burial plot. Select the '382 to 1072' Grave number range.
3. The selection opens a new printable window with an area of the cemetery detailing the grave numbers and a smaller map showing which part of the cemetery is detailed.
   Example: Grave '728'
